CONTENTS OF VOLUME 51

No. 1 (pp 1–124) published January 1999
No. 2 (pp 125–292) published February 1999
No. 3 (pp 293–406) published March 1999
No. 4 (pp 407–544) published April 1999
No. 5 (pp 545–702) published May 1999
No. 6 (pp 703–898) published June 1999

Ansell RJ, Lowe CR: Artifical redox coenzymes: biomimetic analogues of NAD^+ 703

Asperger O, Steinbrenner H, Lehmann A, Petsch M, Griengl H: Induction and functional role of cytochromes P450 in the filamentous fungi *Mortierella alpina* ATCC 8979 and *Cunninghamella blakesleeana* DSM 1906 during hydroxylation of cycloalkylbenzoxazoles 516

Bandhyopadhyay K, Das D, Maiti BR: Solid matrix characterization of immozilized *Pseudomonas putida* MTCC 1194 used for phenol degradation (short contribution) 891

Bang ML, Villadsen I, Sandal T: Cloning and characterization of an endo-β-1,3(4)glucanase and an aspartic protease from *Phaffia rhodozyma* CBS 6938 215

Barriault D, Sylvestre M: Functionality of biphenyl 2,3-dioxygenase components in naphthalene 1,2-dioxygenase 592

Bashan Y, Gonzalez LE: Long-term survival of the plant-growth-promoting bacteria *Azospirillum brasilense* and *Pseudomonas fluorescens* in dry alginate inoculant 262

Bledsoe TL, Cantafio AW, Macy JM: Fermented whey – an inexpensive feed source for a laboratory-scale selenium-bioremediation reactor system inoculated with *Thauera selenatis* 682

Boon M, Meeder TA, Thöne C, Ras C, Heijnen JJ: The ferrous iron oxidation kinetics of *Thiobacillus ferrooxidans* in continuous cultures 820

Boon M, Ras C, Heijnen JJ: The ferrous iron oxidation kinetics of *Thiobacillus ferrooxidans* in batch cultures 813

Borgdorf R, Warwel S: Substrate selectivity of various lipases in the esterification of *cis*- and *trans*-9-octadecenoic acid 480

Bruno-Báreena JM, Ragout AL, Córdoba PR, Siñeriz F: Continuous production of L(+)-lactic acid by *Lactobacillus casei* in two-stage systems 316

Brunswick JM, Kelly CT, Fogarty WM: The amylopullulanase of *Bacillus* sp. DSM 405 170

Cary JW, Barnaby N, Ehrlich KC, Bhatnagar D: Isolation and characterization of experimentally induced, aflatoxin biosynthetic pathway deletion mutants of *Aspergillus parasiticus* 808

Chen D-C, Chen S-Y, Gee M-F, Pan J-T, Kuo T-T: A variant of *Saccharomyces cerevisiae pep4* strain with improved oligotrophic proliferation, cell survival and heterologous secretion of α-amylase 185

Choi J, Lee SY: Factors affecting the economics of polyhydroxyalkanoate production by bacterial fermentation 13

Corroler D, Desmasures N, Gueguen M: Correlation between polymerase chain reaction analysis of the histidine biosynthesis operon, randomly amplified polymorphic DNA analysis and phenotypic characterization of dairy *Lactococcus* isolates 91

Cruz HJ, Ferreira AS, Freitas CM, Moreira JL, Carrondo MJT: Metabolic responses to different glucose and glutamine levels in baby hamster kidney cell culture 579

Daniel H-J, Otto RT, Binder M, Reuss M, Syldatk C: Production of sophorolipids from whey: development of a two-stage process with *Cryptococcus curvatus* ATCC 20509 and *Candida bombicola* ATCC 22214 using deproteinized whey concentrates as substrates 40

De Angelis M, Gobbetti M: *Lactobacillus sanfranciscensis* CB1: manganese, oxygen, superoxide dismutase and metabolism 358

de Best JH, Hage A, Doddema HJ, Janssen DB, Harder W: Complete transformation of 1,1,1-trichloroethane to chloroethane by a methanogenic mixed population 277

de Fátima Silva Lopes M, Cunha AE, Clemente JJ, Teixeira Carrondo MJ, Barreto Crespo MT: Influence of environmental factors on lipase production by *Lactobacillus plantarum* 249

Domingues L, Teixeira JA, Lima N: Construction of a flocculent *Saccharomyces cerevisiae* fermenting lactose 621

Eda S, Hoshino T, Oda M: A novel mutation of the *Bacillus subtilis hut* operon that relieves both catabolite repression and amino acid repression 85

Efiuvwevwere BJO, Gorris LGM, Smid EJ, Kets EPW: Mannitol-enhanced survival of *Lactococcus lactis* subjected to drying (Short contribution) 100

Eriksson M, Dalhammar G, Borg-Karlson A-K: Aerobic degradation of a hydrocarbon mixture in natural uncontaminated potting soil by indigenous microorganisms at 20°C and 6°C (short contribution) 532

Felse PA, Panda T: Regulation and cloning of microbial chitinase genes 141

Ford CZ, Sayler GS, Burlage RS: Containment of a genetically engineered microorganism during a field bioremediation application 401

Garnier PM, Auria R, Augur C, Revah S: Cometabolic biodegradation of methyl *t*-butyl ether by *Pseudomonas aeruginosa* grown on pentane 498

Gawande BN, Goel A, Patkar AY, Nene SN: Purification and properties of a novel raw starch degrading cyclomaltodextrin glucanotransferase from *Bacillus firmus* 504

Gebendinger N, Radosevich M: Inhibition of atrazine degradation by cyanazine and exogenous nitrogen in bacterial isolate M91-3 375

Gorenflo V, Steinbüchel A, Marose ɔ, Rieseberg M, Scheper T: Quantification of bacterial polyhydroxyalkanoic acids by Nile red staining 765

Goswami P, Cooney JJ: Subcellular location of enzymes involved in oxidation of *n*-alkane by *Cladosporium resinae* 860

Goudar CT, Strevett KA, Shah SN: Influence of microbial concentration on the rheology of non-Newtonian fermentation broths 310

Guillouet S, Choi JH, Rha CK, Sinskey AJ: Effects of yeast extract on the production and the quality of the exopolysaccharide, zooglan, produced by *Zoogloea ramigera* 115SLR 235

Hayashi H, Takehara M, Hattori T, Kimura T, Karita S, Sakka K, Ohmiya K: Nucleotide sequences of two contiguous and highly homologous xylanase genes *xynA* and *xynB* and characterization of XynA from *Clostridium thermocellum* 348

Hellenbroich D, Valley U, Ryll T, Wagner R, Tekkanat N, Kessler W, Roß A, Deckwer W.-D: Cultivation of *Tetrahymena thermophila* in a 1.5-m^3 airlift bioreactor 447

Hill GA, Daugulis AJ: Phenol inhibition kinetics for growth of *Acetobacter aceti* on ethanol 841

Hörber C, Christensen N, Arvin E, Kiær Ahring B: Tetrachloroethene dechlorination kinetics by *Dehalospirillum multivorans* immobilized in upflow anaerobic sludge blanket reactors 694

Hofvendahl K, van Niel EWJ, Hahn-Hägerdal B: Effect of temperature and pH on growth and product formation of *Lactococcus lactis* spp. *lactis* ATCC 19435 growing on maltose (Short contribution) 669

Holubar P, Andorfer C, Braun R: Effects of nitrogen limitation on biofilm formation in a hydrocarbon-degrading trickle-bed filter (short contribution) 536

Hong K, Sun S, Tian W, Chen G, Huang W: A rapid method for detecting bacterial polyhydoxyalkanoates in intact cells by Fourier transform infrared spectroscopy (short contribution) 523

Ikeda M, Okamoto K, Katsumata R: Cloning of the transketolase gene and the effect of its dosage on aromatic amino acid production in *Corynebacterium glutamicum* 201

Ishikawa H, Yamanaka H, Kawamoto T, Tanaka A: Enzymatic synthesis of silicon-containing dipeptides with 3-trimethylsilylalanine 470

Itoh N, Tujibata Y, Liu JQ: Cloning and overexpression in *Escherichia coli* of the gene encoding dihydroxyacetone kinase isoenzyme I from *Schizosaccharomyces pombe*, and its application to dihydroxyacetone phosphate production 193

Jolivalt C, Raynal A, Caminade E, Kokel B, Le Goffic F, Mougin C: Transformation of *N'*-N'-dimethyl-*N*-(hydroxyphenyl)ureas by laccase from the white rot fungus *Trametes versicolor* 676

Jung C, Wyss U: New approaches to control plant parasitic nematodes 439

Kacena MA, Merrell GA, Manfredi B, Smith EE, Klaus DM, Todd P: Bacterial growth in space flight: logistic growth curve parameters for *Escherichia coli* and *Bacillus subtilis* 229

Kahala M, Palva A: The expression signals of the *Lactobacillus brevis slpA* gene direct efficient heterologous protein production in lactic acid bacteria 71

Karaffa L, Sándor E, Kozma J, Kubicek CP, Szentirmai A: The role of the alternative respiratory pathway in the stimulation of cephalosporin C formation by soybean oil in *Acremonium chrysogenum* 633

Kastner JR, Jones WJ, Roberts RS: Oxygen starvation induces cell death in *Candida shehatae* fermentations of D-xylose, but not D-glucose 780

Kataoka M, Yamamoto K, Kawabata H, Wada M, Kita K, Yanase H, Shimizu S: Stereoselective reduction of ethyl 4-chloro-3-oxobutanoate by *Escherichia coli* transformant cells coexpressing the aldehyde reductase and glucose dehydrogenase genes 486

Khampang P, Chungjatupornchai W, Luxananil P, Panyim S: Efficient expression of mosquito-larvicidal proteins in a gram-negative bacterium capable of recolonization in the guts of *Anopheles dirus* larva 79

Kimura T, Komiyama T, Furuichi Y, Iimura Y, Karita S, Sakka K, Ohmiya K: *N*-glycosylation is involved in the sensitivity of *Saccharomyces cerevisiae* to HM-1 killer toxin secreted from *Hansenula mrakii* IFO 0895 176

Klostermaier P, Scheyhing CH, Ehrmann M, Vogel RF: Mathematical evaluation of plantaricin formation supports an autoinduced production mechanism 462

König A, Bachmann TT, Metzger JW, Schmid RD: Disposable sensor for measuring the biochemical oxygen demand for nitrification and inhibition of nitrification in wastewater 112

Kondo T, Ikeda T: An electrochemical method for the measurements of substrate-oxidizing activity of acetic acid bacteria using a carbon-paste electrode modified with immobilized bacteria 664

Lang S, Wullbrandt D: Rhamnose lipids – biosynthesis, microbial production and application potential 22

Laplace JM, Sauvageot N, Hartke A, Auffray Y: Characterization of *Lactobacillus collinoides* response to heat, acid and ethanol treatments 659

Launen LA, Pinto L, Moore M: Optimization of pyrene oxidation by *Penicillium janthinellum* using response-surface methodology 510

Ledent P, Michels H, Blackman G, Naveau H, Agathos SN: Reversal of the inhibitory effect of surfactants upon germination and growth of a consortium of two strains of *Bacillus* 370

Lee B-S, Holler E: Effects of culture conditions on β-poly(L-malate) production by *Physarum polycephalum* 647

Liu JQ, Odini M, Dairi T, Itoh N, Shimizu S, Yamada H: A new route to L-*threo*-3-[4-(methylthio)phenylserine], a key intermediate for the synthesis of antibiotics: recombinant low-specificity D-threonine aldolase-catalyzed stereospecific resolution 586

Löser C, Seidel H, Hoffmann P, Zehnsdorf A: Bioavailability of hydrocarbons during microbial remediation of a sandy soil 105

Mai C, Milstein O, Hüttermann A: Fungal laccase grafts acrylamide onto lignin in presence of peroxides (short contribution) 527

Majcherczyk A, Johannes C, Hüttermann A: Oxidation of aromatic alcohols by laccase from *Trametes versicolor* mediated by the 2,2'-azino-bis-(3-ethylbenzothiazoline-6-sulphonic acid) cation radical and dication 267

Margalith PZ: Production of ketocarotenoids by microalgae 431

Miksch G, Neitzel R, Friehs K, Flaschel E: High-level expression of a recombinant protein in *Klebsiella planticola* owing to induced secretion into the culture medium 627

Miron J, Forsberg CW: Characterisation of cellulose-binding proteins that are involved in the adhesion mechanism of *Fibrobacter intestinalis* DR7 491

Morimoto K, Karita S, Kimura T, Sakka K, Ohmiya K: Sequencing, expression, and transcription analysis of the *Clostridium paraputrificum chiA* gene encoding chitinase ChiA 340

Morrison SC, Wood DA, Wood PM: Characterization of a glucose 3-dehydrogenase from the cultivated mushroom (*Agaricus bisporus*) 58

Muheim A, Lerch K: Towards a high-yield bioconversion of ferulic acid to vanillin 456

Murai T, Ueda M, Shibasaki Y, Kamasawa N, Osumi M, Imanaka T, Tanaka A: Development of an arming yeast strain for efficient utilization of starch by co-display of sequential amylolytic enzymes on the cell surface 65

Nakajima-Kambe T, Shigeno-Akutsu Y, Nomura N, Onuma F, Nakahara T: Microbial degradation of polyurethane, polyester polyurethanes and polyether polyurethanes 134

Newcombe DA, Crowley DE: Bioremediation of atrazine-contaminated soil by repeated applications of atrazine-degrading bacteria 877

Niehaus F, Bertoldo C, Kähler M, Antranikian G: Extremophiles as a source of novel enzymes for industrial application 711

Nies DH: Microbial heavy-metal resistance 730

Nörtemann B: Biodegradation of EDTA 751

Obojska A, Lejczak B, Kubrak M: Degradation of phosphonates by streptomycete isolates (short contribution) 872

Obón JM, Maiquez JR, Cánovas M, Kleber H-P, Iborra JL: High-density *Escherichia coli* cultures for continuous L(−)-carnitine production 760

Ogawa J, Xie S-X, Shimizu S: Production of (*R*)-3-pentyn-2-ol through stereospecific hydrolysis of racemic 3-pentyn-2-ol esters with microbial enzymes 53

Okochi M, Taguchi T, Tsuboi M, Nakamura N, Matsunaga T: Fluorometric observation of viable and dead adhering diatoms using TO-PRO-1 iodide and its application to the estimation of electrochemical treatment 364

Onken J, Berger RG: Biotransformation of citronellol by the basidiomycete *Cystoderma carcharias* in an aerated-membrane bioreactor 158

Otte S, Schalk J, Kuenen JG, Jetten MSM: Hydroxylamine oxidation and subsequent nitrous oxide production by the heterotrophic ammonia oxidizer *Alcaligenes faecalis* 255

Pagga U: Compostable packaging materials – test methods and limit values for biodegradation 125

Parekh M, Formanek J, Blaschek HP: Pilot-scale production of butanol by *Clostridium beijerinckii* BA101 using a low-cost fermentation medium based on corn steep water 152

Peypoux F, Bonmatin JM, Wallach J: Recent trends in the biochemistry of surfactin 553

Pyun YR, Jo JS, Park JW, Shin HH: Effects of oxygen on invertase expression in continuous culture of recombinant *Saccharomyces cerevisiae* containing the *SUC2* gene 334

Radnoti de Lipthay J, Barkay T, Vekova J, Sørensen SJ: Utilization of phenoxyacetic acid, by strains using either the *ortho* or *meta* cleavage of catechol during phenol degradation, after conjugal transfer of *tfdA*, the gene encoding a 2,4-dichlorophenoxyacetic acid/2-oxoglutarate dioxygenase 207

Ray P, Ait Oubelli M, Löser C: Aerobic 4-nitrophenol degradation by microorganisms fixed in a continuously working aerated solid-bed reactor 284

Reddy J, Lee C, Neeper M, Greasham R, Zhang J: Development of a bioconversion process for production of *cis*-1*S*,2*R*-indandiol from indene by recombinant *Escherichia coli* constructs 614

Regalado V, Perestelo F, Rodríguez A, Carnicero A, Sosa FJ, De la Fuente G, Falcón MA: Activated oxygen species and two extracellular enzymes: laccase and aryl-alcohol oxidase, novel for the lignin-degrading fungus *Fusarium proliferatum* 388

Riesenberg D, Guthke R: High-cell-density cultivation of microorganisms 422

Roberts DP, Kobayashi DY, Dery PD, Short Jr NM: An image analysis method for determination of spatial colonization patterns of bacteria in plant rhizosphere 653

Rocher M, Goma G, Pilas Begue A, Louvel L, Rols JL: Towards a reduction in excess sludge production in activated sludge processes: biomass physicochemical treatment and biodegradation 883

Sharma HSS, Kilpatrick M, Ward F, Lyons G, Burns L: Colonisation of phase II compost by biotypes of *Trichoderma harzianum* and their effect on mushroom yield and quality 572

Shaw-Reid CA, McCormick MM, Sinskey AJ, Stephanopoulos G: Flux through the tetrahydrodipicolinate succinylase pathway is dispensable for L-lysine production in *Corynebacterium glutamicum* 325

Shen G-J, Shieh J-S, Grethlein AJ, Jain MK, Zeikus JG: Biochemical basis for carbon monoxide tolerance and butanol production by *Butyribacterium methylotrophicum* 827

Shioya S, Morikawa M, Kajihara Y, Shimizu H: Optimization of agitation and aeration conditions for maximum virginiamycin production 164

Sohn J-H, Choi E-S, Kang HA, Rhee J-S, Agaphonov MO, Ter-Avanesyan MD, Rhee SK: A dominant selection system designed for copy-number-controlled gene integration in *Hansenula polymorpha* DL-1 800

Spoeckner S, Wray V, Nimtz M, Lang S: Glycolipids of the smut fungus *Ustilago maydis* from cultivation on renewable resources 33

Suresh C, Dubey AK, Srikanta S, Umesh Kumar S, Karanth NG: Characterisation of a starch-hydrolysing enzyme of *Aspergillus niger* (Short contribution) 673

Suwanto A: Genetically engineered *Rhodobacter sphaeroides* for the overproduction of δ-aminolevulinic acid 794

Swamy J, Ramsay JA: Effects of Mn^{2+} and NH_4^+ concentrations on laccase and manganese peroxidase production and Amaranth decoloration by *Trametes versicolor* 391

Syldatk C, May O, Altenbuchner J, Mattes R, Siemann M: Microbial hydantoinases – industrial enzymes from the origin of life? 293

Tal Y, Rijin J van, Nussinovitch A: Improvement of mechanical and biological properties of freeze-dried denitrifying alginate beads by using starch as a filler and carbon source 773

Tan H-M: Bacterial catabolic transposons 1

Tan NCG, Prenafeta-Buldú FX, Opsteeg JL, Lettinga G, Field JA: Biodegradation of azo dyes in cocultures of anaerobic granular sludge with aerobic aromatic amine degrading enrichment cultures 865

Tenkanen M, Tamminen T, Hortling B: Investigation of lignin-carbohydrate complexes in kraft pulps by selective enzymatic treatments 241

Treadway SL, Yanagimachi KS, Lankenau E, Lessard PA, Stephanopoulos G, Sinskey AJ: Isolation and characterization of indene bioconversion genes from *Rhodococcus* strain I24 786

van Eekert MHA, Stams AJM, Field JA, Schraa G: Gratuitous dechlorination of chloroethanes by methanogenic granular sludge 46

Van Laere KMJ, Voragen CHL, Kroef T, Van den Broek LAM, Beldman G, Voragen AGJ: Purification and mode of action of two different arabinoxylan arabinofuranohydrolases from *Bifidobacterium adolescentis* DSM 20083 606

van Niel EWJ, de Best JH, Kets EPW, Bonting CFC, Kortstee GJJ: Polyphosphate formation by *Acinetobacter johnsonii* 210A: effect of cellular energy status and phosphate-specific transport system 639

Villaverde S, Fernández-Polanco F: Spatial distribution of respiratory activity in *Pseudomonas putida* 54G biofilms degrading volatile organic compounds (VOC) 382

Vollmer MD, Schell U, Seibert V, Lakner S, Schlömann M: Substrate specificities of the chloromuconate cycloisomerases from *Pseudomonas* sp. B13, *Ralstonia eutropha* JMP134 and *Pseudomonas* sp. P51 598

Wachi M, Wijayarathna CD, Teraoka H, Nagai K: A *murC* gene from coryneform bacteria 223

Weber N, Klein E, Mukherjee KD: Long-chain acyl thioesters prepared by solvent-free thioesterification and transthioesterification catalysed by microbial lipases 401

Xu B, Jahic M, Blomsten G, Enfors S-O: Glucose overflow metabolism and mixed-acid fermentation in aerobic large-scale fed-batch processes with *Escherichia coli* 564

Yap LF, Lee YK, Poh CL: Mechanism for phenol tolerance in phenol-degrading *Comamonas testosteroni* strain 833

Yasohara Y, Kizaki N, Hasegawa J, Takahashi S, Wada M, Kataoka M, Shimizu S: Synthesis of optically active ethyl 4-chloro-3-hydroxybutanoate by microbial reduction 847

Yasuda M, Aoyama M, Sakaguchi M, Nakachi K, Kobamoto N: Purification and characterization of a soybean-milk-coagulating enzyme from *Bacillus pumilus* TY0-67 474

Zeikus JG, Jain MK, Elankovan P: Biotechnology of succinic acid production and markets for derived industrial products 545

Zhang J, Greasham R: Chemically defined media for commercial fermentations 407

Zhou JL: Zn biosorption by *Rhizopus arrhizus* and other fungi 686

Zverlov VV, Velikodvorskaya GA, Schwarz WH, Kellermann J, Staudenbauer WL: Duplicated *Clostridium thermocellum* cellobiohydrolase gene encoding cellulosomal subunits S3 and S5 852
